

A scatter plot showing the relationship between Birth (x-axis) and Death (y-axis). The x-axis ranges from 0 to 60, and the y-axis ranges from 0.000 to +∞. A diagonal line represents the identity line (y=x). The plot area is shaded gray below the diagonal line. Two data series are plotted: Series 0 (red dots) and Series 1 (blue dots). Series 0 points are clustered near the origin, with one point at (0, +∞). Series 1 points are scattered above the diagonal line, indicating that Death is greater than Birth for these points.
